

CAREGIVER CONNECTIONS

AN EDUCATIONAL WEBINAR SERIES

Current and Emerging Treatments for Mild Cognitive Impairment (MCI) and Dementia

Thursday, February 16th at 1:00 PM EST

This presentation will cover usage and limitations of current FDA-approved symptomatic treatments and newly approved anti-amyloid therapies (Lecanemab/Leqembi) for MCI and dementia. Dr. Parker will describe the difference between “symptomatic” and “disease modifying” treatments and tell us about new emerging approaches to treatment and prevention.

Dr. Daniel Parker, MD, Duke Geriatrician

Dr. Parker is a geriatrician, memory disorders specialist, and physician at Duke. Dr. Parker diagnoses and manages cognitive impairment at the inter-professional Duke Memory Disorders Clinic.

His research interests center on understanding how diet and exercise improve brain health and reduce the risk of developing dementia.

➔ **March Caregiver Connections scheduled for Tuesday, March 21st at 1PM.**

Can't attend the live event? Don't worry, all Caregiver Connections webinars are recorded and links to presentations will be available on our [website](#).
