Password: 3513

While we know a person with dementia will need to stop driving at some point, the question is when and how will we know? This presentation will address the difficult issue of driving with dementia. Understanding why driving is so important to older adults and why it is difficult to recognize the signs of impairment will be described. Strategies and resources for addressing challenges in relation to driving at the various stages of the dementia process will be highlighted.

Anne E. Dickerson, PhD, OTR/L, SCDCM, FAOTA

Dr. Anne Dickerson is a Professor in East Carolina University's Department of Occupational Therapy and Director of the Research for the Older Adult Driver Initiative (ROADI) and current editor of Occupational Therapy in Health Care.

Dr. Dickerson is an international leader in occupational therapy research in areas of older adults, driver simulation, and drivers with autism spectrum disorder, and driver rehabilitation.

Can't attend the live event? Don't worry, all Caregiver Connections webinars are recorded and links to presentations will be available on our [website](#), along with information on upcoming events.
