
CAREGIVER CONNECTIONS

AN EDUCATIONAL WEBINAR SERIES

Emerging Diagnostic Tools for Dementia

Monday, September 29th at 1PM

Click on [this](#) link to access the presentation the day of the event.

OR call in by dialing
1-646-876-9923

Meeting ID: 965 7747 1018
Password: 3513

Learn about the latest advances in blood tests and brain imaging that are changing how dementia is diagnosed. This session will help family caregivers understand what these emerging tools can (and can't) tell us, and what they might mean for early detection and care planning.

Daniel Parker, M.D., Duke Geriatrician

Dr. Parker is a geriatrician and memory disorders specialist at Duke. He is an associate professor of Medicine, an associate professor in Neurology, and director of the Duke Memory Disorders Clinic.

Dr. Parker's clinical and research interests center on the development and use of disease-modifying treatments for Alzheimer's disease and related dementias.

Can't attend the live event? Don't worry, all Caregiver Connections webinars are recorded and links to presentations will be available on our [website](#), along with information on upcoming events.
