Meeting ID: 965 7747 1018
Password: 3513

This presentation introduces caregivers to medications that can worsen confusion, falls, or behavior changes in people living with dementia. The session also offers a clear, balanced look at the risks and potential benefits of medications used for behavioral symptoms, giving caregivers practical tools to ask informed questions and partner with healthcare providers on safer, more thoughtful treatment decisions.

Tasha Woodall, PharmD, BCGP, CPP

Tasha Woodall is a Board Certified Geriatric Pharmacist and Co-Director of the Center for Healthy Aging at Mountain Area Health Education Center in Asheville. She directs a geriatric pharmacy residency program and serves as an Associate Professor of Clinical Education for the UNC Eshelman School of Pharmacy and UNC School of Medicine.

Can't attend the live event? Don't worry, all Caregiver Connections webinars are recorded and links to presentations will be available on our [website](#), along with information on upcoming events.
